Pharmacovigilance Auditing

Find what an inspector would find. First, calmly, while you can still fix it.

**PV audits are how teams find out,
calmly, what an inspection would find
loudly.**

Qualivio

What we walk through

- » An internal PV audit, from scoping to CAPA closure
- » The checkpoints inspectors actually focus on (and why)
- » How to build a defensible audit trail without drowning in documentation
- » Practical advice for small QPPV teams without dedicated quality functions

01

Risk-based audit scoping

Where to point the audit so the findings actually matter. The areas that move inspection outcomes, not the easy boxes.

02

The checkpoints inspectors return to

Year after year, the same handful of themes surface in inspection reports. Knowing them shortens preparation time meaningfully.

03

CAPAs that close, not loop

How to write findings and corrective actions that get accepted on first review.
The structure inspectors expect to see.
